**VERITAS FACT-FINDING SERIES – EPISODE #98
TUESDAY, SEPTEMBER 13TH, 2022 – 11:00AM EST**

**Kirk Morrison
Profession Engineer**

Kirk is a professional engineer with 40 years of experience in the energy and resources, environmental and infrastructure industries. His career has progressed from the design, construction and management of a variety of energy and resource, environment and infrastructure projects to his current executive, strategic planning and management responsibilities. Kirk is currently completing a project on the Business Case for the Energy Re-mix in Canada for the Canadian Energy & Climate Nexus, as well as developing a green hydrogen project in SE Alberta (Project Portal, Cariboo LCF), and a 15,000 MWh pump storage project in Northern Ontario (Steep Rock Energy, SC Investments). Kirk is a graduate of the ICD DEP.
